

Market-on-Close Futures

Eurex Market-on-Close (MOC) Futures significantly improve MOC trading compared to unlisted variants. MOC futures trade at the cash market index-close ahead of its actual publication. The contract represents the basis which is defined as the difference between the current futures price and the current index cash price.

HOW DOES EUREX MOC FUTURES TRADING WORK?

What are the key benefits?

Increased efficiency

MOC Futures are straight through processed with the regular trading flow, resulting in reduced front office workload and a lower tracking error.

Transparency and liquidity

On-exchange trading offers immediate liquidity and price information.

Eliminated slippage risk

The smaller tick size of Eurex MOC Futures offers more precise pricing with the cash market index-close level. Two decimals are provided according to market conventions.

Availability

The intraday delivery of the underlying makes the EURO STOXX 50® Index Futures immediately available to market participants during the trading session.
